

Accuracy made easy

SlideMate™ AS Slide Printer

How Does It Work?

- Data is sent from the LIS or scanned from the histology cassette to generate a barcode and slide identifier
- Templates can be customized
- Slides are printed using the intuitive software

Slide Delivery System

- The optional Slide Delivery System is designed to hold 72 slides to reduce handling
- Eprelia SlideMate slides can be loaded using optimized packaging

Printing with SlideMate AS is easy as...

SlideMate AS On-Demand Slide Printer

Accurate Identification

- On-demand slide printing at the microtome can increase accuracy as patient identification is maintained

Efficiency

- The SlideMate AS is designed to print slides within 5 seconds, enhancing workflow at the microtome

Connectivity

- SlideMate AS has the option of being connected to other computers as well as LIS or LIMS using a Windows® driver

Workflow Enhancement

- SlideMate AS may be used for barcoding slides within the workflow which allows for additional applications of automated archiving and digital pathology
- With its small footprint, the SlideMate AS slide printer fits directly next to your microtome

The essential partner to your microtome

Fully automated HM355S rotary microtome

Optional slide hopper allows for quicker and easier on-demand printing of slides. Slides can automatically feed from the hopper.

Visit www.epredia.com to learn about SlideMate Pro dual hopper on-demand slide printer.
