

## The Blade to Fit The Job

### **Epredia Microtome and Cryostat Blades:**

Obtaining high-quality sections and minimizing wasted tissue relies on high-quality microtome and cryostat blades. Epredia™ blades offer consistency, durability, and performance with blade coatings and angles to match your application.

- Blades designed for various tissues
- High- and low-profile blades compatible with most manufacturers' microtomes and cryostats
- Steeper bevel angle profile facilitates fast ribboning
- Enhanced user safety with unique blade box for loading into Epredia E style microtome blade holders

### **The Ultra Blade Advantage:**

Outstanding performance and longevity with the hardest of disposable blades available.

- Manufacturing process produces an edge twice as strong as traditional blades
- Hard PTFE coating provides durability and consistency from blade to blade

**Discover the difference.** Contact your local Epredia Account Executive or visit [epredia.com](https://www.epredia.com)
